5/6/68

DearDDck,

On Simpson, I presume you are familiar with Dean's testimony, 5H258, and the exhibits, 12H443-6. Hope you can do something with him, at least find out if it is for reel. Gary is doing very well in Similas when everything is considered.

And it will be excellent if you can get a Canadian committee going. Write Steve Burton, CCiJ Box 150, 308 Westwood Plaza, LA 90024. Box 130 and 90024.

What is exciting is what you point out about the error. One doesn't have to know trajectories (and I've forgotten what I learned in ROTC) to see it. It is just plain common sense.

I have made a copy of your letter and am sending it to Dr. John Nichols, Kansas City, who has done his own excellent work in the field, including by far the best with the weapon. He has conceived and done what occured to no one else and in addition, is an expert pathologist. If you hear fromhim you will know why. He has, in addition to his skills, the weapon with the right sight, the equipment with which to measure, the equipment with which to photograph, and the mind that all require.

Excuse the haste.

Many thnaks,

Sincerely,
